VEDANT TULE

Kutch, Gujarat, India | tulevedant@gmail.com | 7874404555 | LinkedIn | GitHub

SUMMARY

Computer Science & Engineering (AI & ML) student with experience in developing machine learning solutions, performing data analysis, and extracting actionable insights from complex datasets. Skilled in predictive modelling, data preprocessing, visualization, and AI-driven application development, with hands-on experience in Python, SQL, and cloud platforms.

TECHNICAL SKILLS

Programming: Python, Java, C++, SQL

AI/ML: Machine Learning, Deep Learning, NLP, Scikit-learn, XGBoost, Predictive Modelling, Model Validation

Data Analytics: Pandas, NumPy, SQL, EDA, Feature Engineering, Data Visualization, Dashboarding & Reporting

Databases: MySQL, MongDB

Tools & Platforms: Git, GitHub, Jupyter Notebook, Postman, AWS, GCP, OCI, Render, Vercel

Development: REST APIs, Flask, Django

PROJECTS

FinGuard AI – AI Powered Personal Finance & Fraud Detection [GitHub] **July 2026 - Present**

- Developed an AI-powered personal finance platform to analyze spending patterns, categorize expenses, and generate personalized financial insights using machine learning models.
- Built predictive models for fraud detection and spending forecasting, leveraging transaction data to identify anomalies and support data-driven financial decisions.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) to improve model performance and uncover meaningful user spending trends.
- Integrated ML models with the application through REST APIs and collaborated using Git to enable seamless interaction between analytics, backend services, and the user interface..

HydroSense - AI Crop Advisor [GitHub] **Jan 2026 – April 2026**

- Integrated XGBoost machine learning model into a web application, enabling real-time crop recommendations using live environmental sensor data.
- Developed backend logic to establish seamless communication between application workflows and the ML prediction pipeline, ensuring efficient data flow.
- Improved system reliability by performing testing, debugging, and model validation across multiple deployment scenarios to enhance prediction accuracy.
- Collaborated with cross-functional teammates to design scalable software components and user-friendly interfaces, contributing to an improved application experience.

CERTIFICATIONS

- **Applied Machine Learning in Python** – University of Michigan
- **Introduction to Internet of Things** – NPTEL
- **Google Cloud Generative AI** – Google (GCP)
- **OCI Data Science** – Oracle Cloud Infrastructure
- **Cloud Computing** – NPTEL

EDUCATION

Atmiya Vidyapeeth | Class 12th **Mar 2022 - May 2023**

- CBSE | Physics, Chemistry, Mathematics | **Percentage:** 83.8%

Vellore Institute of Technology, Bhopal **Sep 2023 - May 2027**

- B.Tech in Computer Science Engineering - AI&ML | **CGPA:** 8.39
