

Vedant Tule

📍 Kutch, Gujarat | 📞 7874404555 | ✉️ tulevedant@gmail.com | [🌐 LinkedIn](#) | [🐙 GitHub](#) | [🌐 Portfolio](#)

SUMMARY

Computer Science & Engineering (AI & ML) student with hands-on experience in machine learning, data analysis, and predictive modelling. Proficient in Python, SQL, and cloud platforms, with a strong foundation in data preprocessing, visualization, and AI-driven application development.

EDUCATION

Vellore Institute of Technology, Bhopal

B.Tech in Computer Science Engineering – AI & ML

September 2023 – May 2027

CGPA: 8.40

Atmiya Vidyapeeth

Class 12th, CBSE – Physics, Chemistry, Mathematics

March 2022 – May 2023

Percentage: 83.8%

TECHNICAL SKILLS

Programming : Python, C++, Java

AI/ML : Machine Learning, Deep Learning, Prompt Engineering, LLMs

Data Analytics : Pandas, NumPy, SQL, Excel, Exploratory Data Analysis (EDA)

Tools & Platforms : Git, GitHub, Jupyter Notebook, Amazon Web Services (AWS)

EXPERIENCE

MPOnline Limited

Advanced Software Engineering and Development Intern

- Developed a full-stack Library Management System using HTML, CSS, JavaScript, Python, and MySQL, implementing employee management, task assignment, and completion tracking.

MPOnline Limited

AI/ML Intern

- Developed Python-based machine learning solutions involving data preprocessing, model development, and performance evaluation, applying ML techniques to real-world datasets.

PROJECTS

Customer Churn Prediction using Machine Learning | [GitHub](#)

June 2026 – July 2026

- Built an end-to-end churn prediction pipeline on the Telco Customer Churn dataset, covering EDA, preprocessing, and feature selection (RFE, correlation filtering).
- Tuned models via GridSearchCV and evaluated using Accuracy, F1-score, ROC-AUC, and 5-fold cross-validation.
- Identified key churn drivers and translated findings into actionable retention strategies.

HydroSense – AI Crop Advisor | [GitHub](#)

January 2026 – April 2026

- Developed and trained an XGBoost ML model for real-time crop recommendation using live environmental sensor data.
- Integrated the model into the application's backend pipeline, ensuring reliable inference and collaborating with the team on testing and validation.

CERTIFICATIONS

- Applied Machine Learning in Python** – University of Michigan
- OCI Data Science** – Oracle Cloud Infrastructure
- Google Cloud Generative AI** – Google (GCP)
- Cloud Computing** – NPTEL
